

# Public Health Outcomes Framework - Summary of significantly worse indicators in Torbay - May 2016

35 outliers out of 172

## Introduction

This summary brings together performance 'outliers' for the Public Health Outcomes Framework (PHOF) for Torbay by life course stage. Only indicators that were identified as statistically significantly worse than the England average on either an annual basis, or for 3 out of 4 quarters are included in the table below. The contents of the table will be reviewed annually.

The 'thermometers' represent the proportion of PHOF indicators by their significance for local comparator areas. The 'dials' represent the proportion of indicators that are significantly worse in each life course.

Indicators that have changed significance since the last update will feature in Quarterly updates section below.

## Quarterly Updates

● 2.04 - Under 18 conceptions

Newly Added

## Key Symbols

● Significantly Worse

● Not Significant

● Significantly Better
